- MARIADB
- MYSQL
- Social Media
- Software

PROFESSIONAL SUMMARY

Hi my name is Jake Athersmith i am hoping to find a fully remote web developer role as my main goal but i am also looking for a role where i work away from home to teach me how to be more independant for when i do persue my career in web development. Working away from home will also help me build a life of my own meet new friends and get to go out. When i get into my web development career i hope to work fully remote as i prefer to work in my own space and it helps me think a lot better when i work by myself. I am very passionate about technology and i love coding as it makes something different every day not one website is ever the same. Please contact me on 07368855991 or email me at seekajobjake@gmail.com as soon as possible if i am the right one for your role. I do practice coding in my spare time aswell and i am trying to learn unreal engine and c++ to get in to game development but i would happily give anything a go working away from home.

WORK HISTORY

Student Web Developer, 09/2016 to 07/2020

Walsall College - Walsall, West Midlands

- Improved website navigation with clear and intuitive UX mapping.
- Created custom websites by harnessing HTML, CSS and JavaScript skills.
- Managed databases with strong SQL skills.
- Designed web pages to enhance branding and navigation.
- Boosted website performance and stability through planned maintenance and targeted troubleshooting.
- Designed graphics with Adobe Creative Cloud to achieve brand goals.
- Performed thorough testing and analysis to eliminate error and risk.
